Hi! I'm Savilla Banister. I'm a musician, artist, mother, grandmother, teacher, and techy.

Currently I am teaching at BGSU in the area of classroom technologies.

One national standard that I have been focusing on this year in my teaching of undergraduate teacher candidates is from the NETS-T, IIIA:

III. TEACHING, LEARNING, AND THE CURRICULUM.
Teachers implement curriculum plans, that include methods and strategies for applying technology to maximize student learning.

Teachers:
A. Facilitate technology-enhanced experiences that address content standards and student technology standards.

One way I have addressed this standard is by:
• Requiring students to produce an Integrated Lesson Plan that identifies FIRST the curricular goal/objective and THEN outlines a plan for students to use technology to effectively address that curricular focus. (Ex.: The science of sound; using Audacity to record and analyze sound wave forms and manipulate these to see and hear changes in amplitude, frequency, etc.)
