

My animal's name is a Swimming Kitta Fish . The reason it is called a Swimming Kitta Fish is because it has a Bear head,a puppy mouth, wolf eyes,the body of an armadillo,kitten legs,a donkey tail,and fish gills. My Swimming Kitta Fish moves like a cheetah it can run 100 miles per hour. The bear was scary for the head and it can scare people away from their babies .

It has fur all over its body and you can not see the shell for the armadillo. So when people try to kill it, it will not die. Oh I forgot, it can save other animals from the sea.
